

PRESS RELEASE

J.A. Air Center Selected Garmin G1000 King Air Retrofit Installation Distributor

(West Chicago, Ill.) September 26, 2007

J.A. Air Center today announced that their West Chicago, Ill. location has been selected by Garmin International Inc. to perform aftermarket installation of the G1000 Integrated Avionics Suite for King Air C90, 200 and B200 aircraft. J.A. is one of a small, select group of authorized dealers specifically approved for the G1000 retrofit installation program.

The G1000 avionics suite will integrate all primary flight, navigation, communication, terrain, traffic, weather, and Engine Instrumentation System (EIS) on a large 15-inch multi-function display (MFD) and two 10.4-inch primary flight displays (PFD). King Air pilots will enjoy the revolutionary Garmin's GFC 700™ three axis, fully digital, dual channel, fail passive Automatic Flight Control System (AFCS). The GFC 700 includes features you would expect in this class of aircraft like coupled WAAS approaches, coupled vertical navigation and Flight Level Change (FLC).

Other standard features of the G1000 avionics suite include Wide Area Augmentation System (WAAS), Class-B Terrain Awareness and Warning System (TAWS), dual integrated solid-state Attitude and Heading Reference Systems (AHRS), and dual integrated RVSM-capable digital air data computers. Also included are Garmin's SafeTaxi™, ChartView™ and FliteCharts™ that simplify operation, enhance situational awareness and increase safety during flight and when taxiing. Garmin's GDL 69A™ will be available as an option and brings integrated satellite weather datalink and digital-quality audio via XM WX Satellite Weather™ (U.S. only).

J.A. Air Center is now scheduling installations. For more information, contact John Dendekker or Ty Slaven at 800-323-5966.

J.A. Air Center is a FAA Part 145 repair station offering aircraft maintenance and parts, instrument sales and service, award winning avionics installation and service, FBO services, aircraft sales and acquisitions, mail order avionics and consumer GPS sales. Serving the business aviation community from facilities in West Chicago and DeKalb Illinois with a new facility scheduled to open in 2008 in Aurora Illinois. J.A. Air Center, formerly know as Joliet Avionics has been serving business aviation since 1965. For more info contact: dzeitler@jaair.com
